Feature highlights

Brilliant presentation

- Unique, elegant design
- Acer ColorBoost technology
- 2000 Lumens brightness and 2000:1 contrast ratio
- SVGA resolution
- DLP® system design

Uncomplicated usability

- Acer eView Management with innovative Blackboard Mode
- Acer eTimer Management
- Acer SmartFormat technology
- Acer InstantPack technology
- Automatic safety shutdown
- Quick signal detection

Dynamic functionality

- Longer lamp life (4000 hours)
- Keystone correction (40° vertical)
- Digital zoom and pan
- PIN security
- RC security
- Windows Vista® compliance

ColorBoost

SmartFormat

Acer ColorBoost Technology

Featuring an optimized 6-segment color-wheel design, powerful image processing, and advanced lamp illumination technology Acer ColorBoost technology provides incredible color performance, never before seen in conventional projectors. Brilliant color with a high contrast ratio presents ultra-vivid images for business presentations, educational purposes, and home entertainment.

Acer SmartFormat Technology

Conveniently supports comprehensive wide-format PC signals. Users no longer need to worry about annoying "Signal not supported" issues, nor must they change the resolution of their wide-format notebook.

Acer eTimer Management

A digital clock that can be set by the user and displayed onscreen for convenient reference keeps presentations going at the right pace. Acer eTimer Management also features a visual countdown and alarm, or countdown alone, to warn the presenter when time is up.

Acer eView Management with Blackboard Mode

Acer eView Management helps users adjust their projector settings to suit any environment and any type of content in just a few moments. Six factory or user-defined presets instantly reconfigure color, brightness and contrast to deliver best-quality images every time. Innovative Blackboard Mode allows users to instantly project onto a traditional green chalkboard. There is no longer a need to set up a separate white screen.

Instant Pack

If the user is in a hurry to leave, the power cord can be unplugged right after the projector is turned off, without any resulting damage. There's no need to wait for a cooling period; the user can pack up the projector and leave immediately.

15-pin D-Sub for PC analog signal/
HDTV/component video input

AC-in jack

S-video mini DIN

Composite video RCA jack

3.5 mm audio mini jack

Kensington lock slot

USB connector for remote computer control
