* All specifications subject to change

** Some resolutions may require Component/Vesa adapter

*** Resolution support may be product specific

**** Actual lamp life may vary based on the ambient environment. Conditions that may affect lamp life include temperature, altitude, and rapidly switching the projector on and off.

Work Big IN42+

Work Big IN42+

Everlasting limelight.

When your colleagues have an important presentation or need an IT miracle, they know you're the resident magician who can take care of everything. Your magic? Iron-clad trust in your InFocus projectors to perform each and every time. Your coworkers continuously impress audiences and clients in the conference room, and have complete confidence that their projector is up to the task. With the InFocus Work Big IN42+, you share the feeling.

Designed specifically for large meeting rooms and auditoriums, the IN42+ offers all the features and connectivity you'll ever need. The IN42+ includes RS232 and RJ45 connections, which enable seamless integration to your existing IT infrastructure, while the M1-DA and D-sub 15-pin VGA port connectors provide inputs for a variety of sources. Just the kinds of features you'd expect from the company that pioneered Systems- and Integration- class projectors.

Get some serious peace of mind.

Built in to InFocus' flagship IN42+ is an all-new web interface manager. This utility allows users and administrators to access a wide array of programming functionality, ranging from picture and audio settings to power control, automated status reminders and diagnostic controls. You'll never have to mount a huge ladder or take a laptop skyward to check on the health or performance of an InFocus IN42+, you can do it all from any point in your network!

More lumens, brighter ideas.

Maybe you're thinking that all this networking capability comes at the expense of brightness – hardly. We dislike sacrifice as much as you do! The IN42+ boasts 4,000 max ANSI lumens—bright enough to leave the lights on, or the window shades open during presentations. Upgraded LCD panels feature onboard Micro-Lens Array to eliminate pixel isolation while producing high contrast ratios and better color saturation. In addition, the ultra-precise manual zoom, focus, and lens shift allow for the finest adjustability available.

An easy to use, icon-based remote allows you to quickly scroll and select your settings.

Not only will your digital presentations look rich and crisp, but the IN42+ projects HD-quality images that will really please the audience.

Form, function and features.

The IN42+ features a new industrial design that's as alluring as the images it projects. As a protective measure the lens has been recessed, and a bright, intuitive LED feedback panel is built-in to keep all users informed.

Other features include:

⤳ Onboard web-interface manager for ultimate control & awareness

⤳ Full ProjectAbility keypad for easy access to over 90% of the standard projector adjustments

⤳ Business basic remote control

⤳ Audible start-up/power-down cues

⤳ Quiet operation at <32dBA

⤳ Tie wraps to ensure easy stowaway of both the power and data cables

Add it all up and you've got a projector that stands out from all the rest. Plus, with an affordable price point, the IN42+ has a feature even the accounting organization will enjoy.
