

Acer P1200 - Colour Boost - 3D Ready

£469,99

incl. 17,5% VAT plus delivery charges

The DLP® 3D ready Acer P1200 projector presents breathtaking visuals for remarkable SMB or classroom presentations. Convenient utilities make this projector easy to set up, while advanced power-management solutions conserve energy and the Earth's resources. To top it off, the P1200 is available for remarkably good value.

Prolific imagery

Whether you're making business presentations or giving academic lectures, the DLP® 3D ready Acer P1200 projector renders fascinating, multi-dimensional imagery. Advanced Acer ColorBoost II+ technology enlivens graphics with lifelike colors, while 2600 ANSI lumens brightness, a 3700:1 contrast ratio and XGA resolution depict sharp details. Additionally, Acer ColorSafe technology preserves image integrity even with prolonged use.

Empowering usability

The Empowering Key offers instant access to Acer Empowering Technology tools for easy customization of power, viewing and timer settings. Acer SmartFormat technology facilitates projection of wide-format content without complicated resolution settings. Acer Instant Pack technology lets you safely unplug the power cord right after the projector is turned off, so you can pack up and go immediately. Also offered is closed captioning, so dialog and non-speech audio can be displayed as text for hearing-challenged individuals. What's more, the wall-color compensation feature enables the projector to display colors accurately even when the image is projected on a colored wall.

Convenient installation

The auto keystone correction feature automatically eliminates vertical distortions, while a gravity sensor instantly detects that the projector is ceiling mounted and rotates the projected images 180° to ensure the correct orientation. And thanks to the installation menu, signal input from a notebook is no longer required, so mounting the P1200 on the ceiling is fast and convenient.

Eco-friendly functionality

Acer EcoProjection technology cuts standby power consumption to a single watt, for environment-friendly power management. Up to 5000 hours of lamp life saves lamp replacement costs and ensures long-term, dependable projector use. And, ECO Mode extends lamp lifespan and reduces noise and power consumption.

Technical data

Brightness	2600 ANSI Lumens
Brightness (long life)	2080 ANSI Lumens
Resolution	1024 x 768 XGA
Type	DLP
Contrast	3700 : 1
