VERY POWERFUL FOR A PROFESSIONAL QUALITY OF PICTURE

Do not plunge your audience in the darkness! With its 3000 lumens, the FLP 3000-X is very bright and gives your presentation clarity whatever the light. It allows your audience to see your presentation with complete clarity. Get a large image! This way its luminosity allows you to give your presentations wherever you want, in a small or big meeting room, even in a conference room.

Be precise! Thank to its high XGA resolution which gives the picture more pixels, your pictures are clearer and you can see every detail.

Finally, not only does the MLP 3000-X relay the whole nuance of colours, but also the brightness thanks to its very wide range of colours.

USER - FRIENDLY, ADAPTED TO YOUR BUSINESS

No more problems with compatibility.

The FLP 3000-X can be adapted to many picture resolutions such as SXGA/XGA/SVGA/VGA. The complete connections offered by the FLP 3000-X enable you to connect to every type of connection such as PC/MAC/PDA/DVD PLAYER. In fact it has as standard VGA connections; composite, Svideo, component DVI - the most advanced technology in terms of picture transmission.

The FLP 3000-X is a polyvalent tool adapted to every room for business! Its horizontal and vertical keystone helps you to adjust the picture size no matter your room size. The FLP 3000 X can also be installed behind the screen thanks to the REAR projection technology.

A PROFESSIONAL PROJECTOR

Make your presentation even more attractive!

The FLP 3000-X remote control with its integrated mouse allows you to totally control your computer at any distance. This way you can go to the following slide or open another file without moving, or even; attract the attention of the audience to a point thanks to the laser pointer.

The FLP 3000-X is also very quiet (38 dB), which allows the audience to concentrate!

CONTROL!

The inlaying function **Picture in Picture** enables you to visualise on the screen 2 different pictures. This way, a slide and the speaker's face can be projected at the same time.

Furthermore, the **Freeze Mode** allows you to freeze a presentation in progress while opening another document without your audience noticing it. **The remote control can also be used to zoom over a picture.**

CALL CENTRE

Take advantage of the after sales service with access to the call centre which solve quickly operating problems.

VIDEO PROJECTOR INTEGRATION IN THE PROFESSIONAL ENVIRONMENT

The optical protection mask and the ceiling kit ensure the best conditions for setting and safety.

The set up and the use of your SAGEM video projector in the professional environment are facilitated by a complete range of accessories (supplying cable, video, composite, handbook, infrared remote control with mouse piloting and laser pointer).

Ready to project at purchase, your equipment is delivered with a lamp (lamp life 1500 hours).
