# Wireless Mobile XGA Projector

## 2500 ANSI lumen

**Wireless presentations are made truly simple with the VPL-CX75, using Sony's Air Shot™ technology and Memory Stick™.**

The Sony VPL-CX75 is packed with features that will impress in an instant and add impact to presentations by removing the need for cables. Sony's Air Shot™ technology also makes wireless presentations easy enough for first-time users. High brightness and high resolution ensure superb picture quality in any environment and thanks to Side Shot™ this projector does not have to be placed directly at the centre of the screen.

## Key Features

### Air Shot™

Sony's Air Shot™ makes wireless presentations extremely easy and quick to set up due to a simple, 3-step set-up process:

1  Insert the wireless LAN card into the projector and turn it on
2  Insert the wireless LAN module into the PC
3  The projector and computer will automatically configure and the PC image will automatically be projected.

Experienced users can work outside "simple mode" to utilise further features of this software. The software which must be downloaded onto the PC, and all other accessories, including a stylish remote control with a laser pointer are supplied with the projector.

### Memory Stick™

Sony Projector Station software (supplied) can be used to transfer presentation slides or images into a format that can be read directly from the Memory Stick™, so information can be presented without the need for a PC.

## Additional Features

### Off & Go Function

The fan continues to cool the projector after the power supply is removed, enabling users to unplug the projector immediately after use, without damaging the lamp. (Other projectors need to be cooled and remain connected to the power supply after use.)

### Advanced Intelligent Auto Set-up
*with Auto Focus Adjustment*

Press the 'on' button and the projector will complete the following steps automatically, ensuring ease of operation:

1  Lens protector opens automatically (which also avoids loss of the lens cap)
2  Projector tilts to previously used angle
3  Auto keystone correction is completed
4  *Built in Auto Focus module corrects focus*
5  Auto input search occurs
6  Smart Auto Pixel Alignment (APA) is completed.

### Side Shot™

No need to place the projector directly in front of the screen – Side Shot™ will adjust the signal and display a correct image even when the projector is placed to the side of the screen.

### Control Panel Lock

This function locks the controls on the top and side of the projector, to prevent unauthorised or unintentional use of the controls. Functionality can be switched 'on' or 'off'.

### Password Protection

When this function is activated a password is required to use the projector (if the password is lost, Sony is able to retrieve it).

You make it a Sony

# VPL-CX75

## Inputs

## Air Shot™ Kit (supplied)

USB Wireless Module for PC

USB Storage Media with Air Shot™ software

Remote Commander with Laser Pointer

Wireless LAN Card for projector

CD-ROM with Air Shot™ software and Projector Station for Presentation software is also included.
