**the perfection of
simplicity**

simplicity,
when taken to an extreme,
becomes perfection

"Anyone familiar with Barco projectors over the years will know that the company doesn't do things by halves. It's a high-end manufacturer and proud of it. But even its many years of cutting-edge CRT projectors couldn't have prepared us for CineVERSUM ... Perhaps the ultimate recommendation I can give the picture quality of the CineVERSUM is that I can't find a single bad thing to say about it. And the same goes for the genius CineVERSUM Master. In fact, Barco's CineVERSUM system is, quite simply, home cinema par excellence."

John Archer, Home Cinema Choice.

**perfection in home
cinema**

Harmony between form and function, the ideal between minimalism and refinement and the use of pure materials such as aluminium and steel reflect the CineVERSUM's dedication to absolute product integrity.

With its subtle shapes and purity of form the CineVERSUM range brings you the timelessness and elegance of European design.

european design

"When you do something, do it well".

These timeless words are the driving force behind the design and technology of all our products.

In our quest for the perfect design, we turned to nature for inspiration.

The perfect symmetry of a single raindrop. The gracious curve of a petal. The stark silhouette of a leaf. Inspired by the timeless elegance of these natural objects, Barco's new CineVERSUM range was born. In the flawless representation of each tiny detail and the life-like reproduction of colour we found our ultimate goal: perfection in home cinema.

annemie van elsen
product design engineer

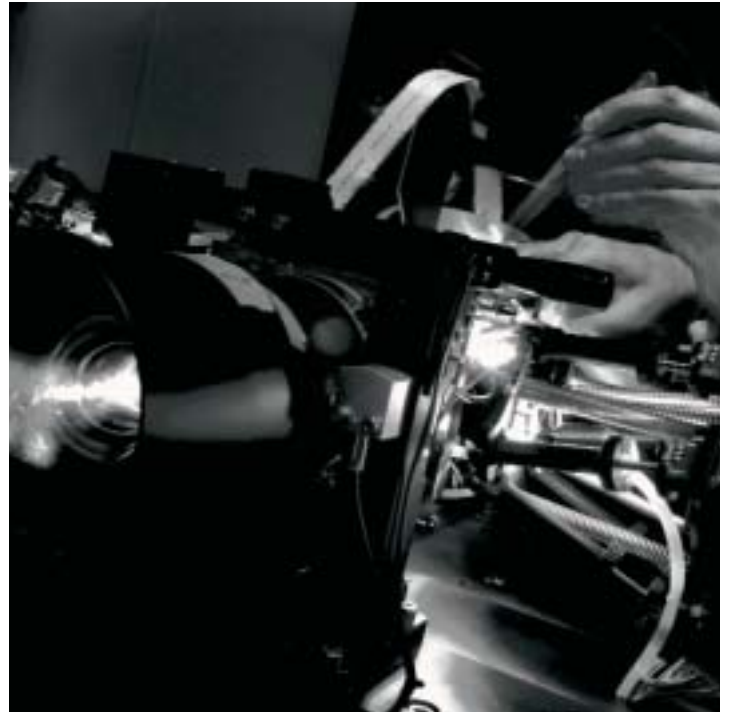

The CineVERSUM range is not only crafted to look magnificent by itself, it is also designed to integrate perfectly into any type of interior, in any size of room.

Various options for lenses, a single cable digital link between projector and sources, and other but still important details such as lens shift and integrated covers that hide all cables leave you total freedom of choice.

To help you explore all these different installation possibilities and choose the optimum for your specific requirement, the CineVERSUM solutions are available through carefully selected and highly skilled Barco Home Cinema Authorized Dealers.

integration

technology

Barco has been an expert in professional visualization technologies for well over fifty years, and has been providing some of the world's best known names with its state-of-the-art imaging solutions. A market leader in application areas ranging from life-critical medical displays to the booming digital cinema market, Barco is renowned as the authority on visualization technology.

Barco once more brings you the latest in imaging technology with the introduction of its innovative CineVERSUM range. Developed in close cooperation with Barco Digital Cinema, which provides DLP Cinema™ equipment to Hollywood's leading film studios and theaters worldwide, the CineVERSUM range brings the film industry's technology of choice to your home.

Based on Barco's professional digital cinema know how, the CineVERSUM range comes equipped with the industry's best-of-breed video processing power.

It delivers superior performance for both film as well as standard video playback such as sports, music and news broadcasts, while the CineVERSUM Master - Barco's unique video processor - transports uncompressed, high definition video pictures to ensure a brilliant projection worth the Barco name!

products

With its compact, lightweight design the CineVERSUM 60 is Barco's answer to high quality projection for screens measuring 60" to 80" diagonal (130 cm to 180 cm wide).

Accommodating these typical screen sizes and offering a medium or long throw zoom lenses, the CineVERSUM 60 can be conveniently positioned in the center or at the rear of any room to ensure stylish integration.

A full array of analog and digital inputs accommodates a wide variety of sources including DVD, satellite and TV receivers, as well as the latest High Definition sources. The CineVERSUM 60 features a standard definition wide aspect ratio DLP™ chip from Texas Instruments.

*Cine*VERSUM 60

The CineVERSUM 70 shares the stylish European design of the CineVERSUM 60, but comes equipped with Texas Instruments' latest High Definition DLP™ chip.

By means of its superior optical components, the CineVERSUM 70 is ideally suited for screen sizes ranging from 70" to 90" diagonal (150 cm to 200 cm wide), while a medium or short throw zoom lens enables convenient installation in most environment.

With its full array of analog and digital inputs accommodating a wide variety of sources including DVD, satellite and TV receivers, as well as High Definition sources, the CineVERSUM 70 offers a breath-taking cinema experience in the comfort of your home.

*Cine*VERSUM 70

Equipped with the latest High Definition DLP™ chip, the CineVERSUM 80 + Master is the ultimate compact home cinema projection solution. With its precision optics, the CineVERSUM 80 becomes the projector of choice for screens between 80" and 100" diagonal (180 cm to 220 cm wide).

This extremely flexible projector can be moved and shifted up- or downward in relation to the screen. When coupled with one of a wide array of lenses, it enables installation either very close or very far away from the screen.

The CineVERSUM Master, Barco's state-of-the-art video processor, is linked to the projector by means of a single unobtrusive digital cable.

The European design and solid aluminium finishing makes this combination the ideal choice for a stylish, discrete integration in any home. The CineVERSUM 80 + Master combination is by far the most elegant solution for the Home Cinema enthusiast with an appreciation for complex, delicate soundtracks.

80 | master

The CineVERSUM 110 is the very first home cinema projector based on the most powerful High Definition 3-chip DLP™ technology.

Perfectly matching the needs of the discerning home cinema enthusiast, the CineVERSUM 110 enables viewing on typical screen sizes ranging from 90" to 150" diagonal (200 cm to 330 cm wide), also ensuring a high quality picture even in brighter environments.

The CineVERSUM 110 features a wide array of lenses, which allow it to project out-of-axis, both horizontally and vertically, and make it the ideal projector for installation in the most complex environment.

The CineVERSUM 110 processes signals from multiple sources including DVD, satellite and TV receivers, HTPCs and High Definition Sources, accommodating both today and tomorrow's technologies.

*Cine*VERSUM 110

The extremely powerful CineVERSUM 120 + Master combination provides the ultimate in home cinema entertainment.

The CineVERSUM 120 accommodates screen sizes of 90" to 150" diagonal (200 cm to 330 cm wide) and ensures a high quality picture even in brighter environments.

With a wide versatility of lenses, the CineVERSUM 120 can project out-of-axis both horizontally and vertically, which make the projector ideal for installation in the architecturally most demanding environments.

Combined with the CineVERSUM Master and its Digital Link, the ultimate CineVERSUM system accommodates both analog and digital sources, combining extreme picture quality with elegant installation capabilities and future-proof modularity.

The CineVERSUM 120 + Master is Barco's flagship home cinema projection solution and proudly carries a reputation as the industry's best-of-breed home cinema system. The closest you can get to a genuine digital cinema experience in the comfort of your own home.

bringing digital cinema home

Within the larger Barco group, both Barco Digital Cinema and Barco Home Cinema specialise in the manufacturing and distribution of video projection products aimed at the discerning viewer.

From *Gone With The Wind* to *The Matrix Reloaded*, each film represents a director's dream. With carefully chosen actors, artfully constructed sets and meticulously shot scenes, the director creates the desired atmosphere in which to tell his story. At Barco Home Cinema we share the passion and commitment of the director. Our aim: to create an unforgettable film experience, which honours each visual nuance of the story, in the comfort of your own home.

Developed in close cooperation with Barco Digital Cinema, which provides DLP Cinema™ equipment to Hollywood's leading movie studios and theatres, the new CineVERSUM range offers you ultimate image quality combined with stylish design and unparalleled flexibility, bringing the home cinema of the future to your living room.
