Wireless Projection - Screen Mirroring Support
Paring with Acer wireless dongle, you will be able to skip the cable and project from your smartphone, laptop or PC via wireless signal. Miracast support allows quick and seamless screen-mirroring without installing extra app. Windows 10 laptop/PC has built-in ability for Miracast, so your presentation can be as easy as click-and-play.

Mobile USB Display
Besides display via HDMI or VGA cable, X1 offers USB as an additional display option for your smartphone and tablet. Image can be displayed directly over USB cable from an Android/iOS2[3]device. You can bring the presentation file or teaching material via mobile and easily share to big screen.

Acer LumiSense
LumiSense incorporates a clever content-aware process. It analyzes projected content frame by frame and dynamically adjusts image visibility to optimum levels. Thanks to LumiSense intelligent judgment and dynamic adjustment, all dark scenes are clearly displayed with no loss of detail.

Acer BlueLightShield
Protect your eyes from unnecessary strain by utilizing Acer BlueLightShield™ technology. Each level of blue light filters contains dynamic mechanism to optimize blue light level based on content. BluelightShield can reduces up to 30% blue light.
