Play Big SP4805

Here comes the neighborhood.

Popularity has its perks. You'll learn all about them with an InFocus Play Big SP4805 home entertainment projector around the house. Bring home the biggest, richest, boldest display possible for your favorite movies, sports and gaming. Then invite everyone else to bring the refreshments. Chances are, they'll be inviting themselves over anyway. Whatever you do, forget about keeping this visual perfection to yourself. With this much breathtaking action and eye-popping brightness jumping off the screen, your new SP4805 won't be a secret for long.

Tickets. What tickets?

It's hard to believe you once stood in line for this sort of experience. With the SP4805, you'll get sumptuous image richness and color depth that rivals any movie-theater screen. Your chairs may not be plush velvet and your kitchen may not serve overpriced bottomless fountain drinks, but the wonder and convenience of having a true movie theater experience on your living room couch may just make up for it.

Native 480p resolution creates high-definition reality from any HD source.

Learning curves are for school.

Remember the first time you programmed a VCR? Drove a clutch? Used your microwave? Now forget all those mind-bending experiences. You probably can't imagine how easy it is to power up and use the SP4805 projector. A few examples:

- A simple keypad and intuitive home entertainment remote control with programmable buttons make setup a snap.
- Not easy enough for you? An icon-based menu allows you to quickly scroll and select your settings in your choice of 12 languages — without interrupting the show.
- Multiple video sources enable impressive connectivity with a full range of devices, including VCRs, DVDs, component and RGB HDTVs, EDTVs, standard TVs, game consoles and computers.
- Set your SP4805 on your coffee table or mount it to your ceiling.

Connect easily to multiple sources.

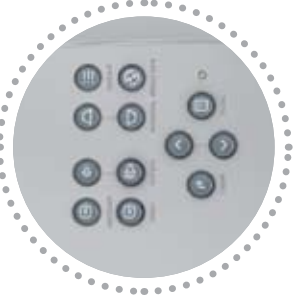

InFocus

Roll the credits.

The SP4805 projects rich, true colors right out of the box, thanks to the new native DarkChip2™ DLP® chip from Texas Instruments®, which allows for an impressive 2000:1 contrast ratio. It's the only display solution that creates an entirely digital connection between a source and the screen in front of you. Here are a few more of the show-stopping features ensuring images that are better than film:

- Native 480p resolution creates high-definition reality from any HD source.
- A full 750 video-optimized lumens ensure brilliant, dramatic SMPTE (cinema-standard) brightness.
- Academy Award®-winning enhanced Faroudja® DCDI™ video processing produces images that are clear and artifact-free, without those jagged lines you see on some large-format displays.

An icon-based menu allows you to quickly scroll and select your settings.

Enduring Quality

If you're happy, InFocus is happy. That's why every InFocus projector comes with a standard limited factory warranty (including parts and labor) and a 90-day lamp-replacement warranty.
