

Play Big SP7205

Your standards have been surpassed.

Flawless images. Check. Impeccable video performance. Check. Photography-grade optical lens from Carl Zeiss. Check. Extraordinary value. Check. Looks like you're done shopping for a new top-of-the-line home-theater projector. The InFocus Play Big SP7205 has every requirement you can think of. In fact, it's the first to combine exclusive high-definition o.8" Mustang HD2+ 720p from Texas Instruments[®] with proprietary enhanced DCDi[™] technology from Faroudja.[®] It's built on the platform awarded Best Video Product by the Custom Electronic Design Installation Association. And it's perfectly calibrated right out of the box to D65 color standards. What does that mean for your home theater? Nothing but the best.

Learning curves are for school.

Remember the first time you programmed a VCR? Drove a clutch? Used your microwave? Now forget all those mind-bending experiences. You probably can't imagine how easy it is to turn on and use a SP7205 projector.

A few examples:

- → Enjoy setup in a snap with a simple keypad and a full-featured remote control.
- → An icon-based menu allows you to quickly scroll and select your settings in your choice of 12 languages — without interrupting the show.
- → Intuitive design, controls, and easy-toreach connections allow you to quickly and concurrently hook up your DVD player, VCR, cable or satellite receiver, game console, camcorder, even your PC.

Pure images. Pure wow.

With a stunning 2200:1 calibrated contrast ratio and 1100 video-optimized lumens, your SP7205 displays crisp, pop-off-the-screen images against true blacks and detailed grayscale at correct SMPTE brightness on large screens.

Here are a few more show-stopping features:

- \rightarrow Native HD resolution ensures pixel-to-pixel match from the source.
- \rightarrow The custom-designed 7-segment color wheel improves upon existing 6-segment wheels by providing more bit depth, resulting in significantly smoother images.
- \rightarrow The new "ALPS" HD2.5 DMD doubles your contrast.
- ightarrow An all-glass Zeiss zoom lens contributes to a sealed optical system.

Enduring Quality

If you're happy, InFocus is happy. That's why every InFocus projector comes with a standard two-year limited factory warranty (including parts and labor) and a 90-day lamp-replacement warranty.

Optional Accessories

Projection Screens Performance Cables for Digital and HDTV **Ceiling Mount** Cable Adapters
