

A woman with short blonde hair, wearing a brown suit jacket over a light blue collared shirt, stands at a wooden podium with a microphone. She is smiling and gesturing with her right hand towards an audience. The audience, consisting of several people in business attire, is seated in the background and appears to be clapping. The scene is set in a bright, white environment. On the left side of the image, there is a vertical decorative element consisting of overlapping, wavy bands of color: red, orange, yellow, and green, with a dotted line pattern running through them.

Work Big IN42

Work Big IN42

 InFocus

A force to be reckoned with.

When your colleagues need an IT miracle, they know you're the resident magician who can get it done. Your magic? Just some iron-clad trust in your projectors to perform each and every time. Your colleagues manage to impress audiences and clients with big presentations every day, and have complete confidence that their projector is up to the task. With the InFocus Work Big IN42, you share the feeling.

Crisp, clear pictures and bright, rich colors make for impressive images each and every time. Give your users the power to command an audience like never before with the IN42. This is a high-performance projector loaded with the features your colleagues want most. What you'll love is the rock-solid reliability and high-performance images you can count on time after time. With the IN42, your staff will present with power and confidence and you'll sleep better at night.

Get some serious peace of mind.

Designed specifically for large meeting rooms and auditoriums, the IN42 offers all the features and connectivity you'll ever need. The IN42 includes RS232 and RJ45 connections, which enable seamless integration to your existing IT infrastructure, while the M1-DA and VESA connectors provide inputs for a variety of sources. Just the kinds of features you'd expect from the company that pioneered Systems-and Integration-class projectors.

More lumens, brighter ideas.

Maybe you're thinking that all this networking capability comes at the expense of brightness—hardly. We dislike sacrifice as much as you do! The IN42 boasts 3,500 max ANSI lumens—bright enough to leave the lights-on, or the window shades open during presentations. Upgraded LCD panels produce high contrast ratios and better color saturation to fully command an audience's attention. In addition, the ultra-precise manual zoom, focus and lens shift allow for the finest adjustability available.

 An easy to use, icon-based remote allows you to quickly scroll and select your settings.

Form, function and features.

The IN42 features a new industrial design that's as alluring as the images it projects. As a protective measure the lens has been recessed, and a bright, intuitive LED feedback panel is built-in to keep all users informed.

Other features include:

- Quiet operation at $\leq 32\text{dBA}$
- Top-mounted keypad for easy access to the standard projector adjustments you need
- Business basic remote control
- Audible start-up/power-down cues
- Tie wraps to ensure easy stowaway of both the power and data cables

Add it all up and you've got a projector that stands out from all the rest. Plus, with an affordable price point, the IN42 has a feature even the accounting organization will enjoy.

The IN42 is designed with all the connectivity options you'll ever need, enabling you to seamlessly integrate this projector into any IT infrastructure.

Enduring Quality

If you're happy, InFocus is happy. That's why every InFocus projector comes with a standard one-year limited factory warranty (including parts and labor) and a six-month lamp-replacement warranty.
