All inclusive Home Cinema: et20 with DVD-Player and 5.1 sound

Even closer Home Cinema

"Extreme Short" home cinema set

Toshiba's et10/et20 have redefined home cinema enjoyment: crystal-clear images, even at extreme short projection distances, fantastic cinema quality sound and uniquely easy to operate. And all in a deep-black designed chassis. The et20 even comes with an integral DVD player.

Extreme Short Projection™ – Closer than ever before

When it's time for aliens to land on your wall or projection screen, for footballs to bounce back off goalposts or for your favourite star to rock through your living room, you'll be able to get closer to the action than ever before. Because only Toshiba's et10 and et20 are equipped with ESP™ technology. ESP™ stands for "Extreme Short Projection™" and is synonymous with perfect home cinema viewing. The image diagonals measure more than two metres at a projection distance of only one metre. So the et10 and et20 bring true home cinema enjoyment to everybody, whatever the size of the room!

5.1 Surround – sound you just won't believe

We have equipped the et10 and et20 with Dolby Pro-Logic 5.1 Surround sound to bring genuine cinema sound quality to your living room. The unit comes with 5 built-in speakers and 1 subwoofer, making other audio equipment totally superfluous.

A cutting-edge design statement, but incredibly easy to operate

The extravagant housing, is complemented by uniquely easy operation. A cover at the front of the et10 and et20 conceals all the video, data and audio connection ports – easy on the eye and for extra comfort.

Real-life film action in close-up

Regardless of your seating arrangements, ESP™ allows you to choose the best projector position for perfect results. Sensational home cinema image quality even when the projection distance is restricted!

Have fun

Linking up to other devices like an X-Box is child's play: all the connection ports are easily accessible at the front of the et10/et20. And DolbyPro-Logic 5.1 Surround sound means you don't need an external speaker.

Easy-to-use

Getting started with your slide show or film show is easy: thanks to the integral DVD player and USB port, all you need is a mains supply cable. Connecting up other devices, which can be a complex business, is a thing of the past!
