

ScreenPlay™ 4805

Ease makes you the expert

An intuitive menu system and colour-coded connectors mean you are up and running in no time. In fact, the entire projector is designed to be easy to use, so whether you're setting up, adjusting, or connecting, the ScreenPlay 4805 is never a mystery.

The InFocus commitment.

Experience for yourself why InFocus Corporation is the worldwide leader in digital projection. Our dedication to quality and customer satisfaction is reflected in service options that will ensure the best experience at any time. InFocus ScreenPlay projectors come with a standard two-year limited factory warranty, including parts and labour, and a 90-day lamp replacement warranty. Our customer support offers you premium service and convenience, whatever your needs.

ScreenPlay™ 4805

Home Entertainment Projector

InFocus®
ScreenPlay

See the bigger picture.

Turn your living room into a home entertainment centre. With a screen size that can fill a wall, the InFocus ScreenPlay 4805 makes any big-screen TV seem tiny. Expand your idea of home entertainment with award-winning InFocus ScreenPlay projection, see the quality of InFocus engineering and discover picture details you didn't even know were there. The InFocus ScreenPlay 4805 is easy to set up and use in any room with your satellite receiver, DVD player, VCR, games console, and more. Big images truly come to life with the ScreenPlay 4805.

More than just big, it's breathtaking.

The ScreenPlay 4805 projector gives you a screen size that's measured in feet and metres, not inches and centimetres, up to 10 feet or 3 metres. So big, athletes nearly jump out of the screen into your living room and so real, it's almost like you're in the football stadium when your team scores the goal. Video game characters are big enough to actually take you on. An optical zoom lens enables you to adjust the huge image to fit virtually any size screen from any location, in perfect focus and clarity. Native 16:9 wide-screen format gives you cinematic proportions, so you and all of your friends won't miss a bit of the action. At last, you have a big, bright, high-definition image to do justice to the quality of your surround sound and DVD.

ScreenPlay™ 4805

The ScreenPlay advantage.

The passion for home cinema is why InFocus developed the InFocus ScreenPlay™ series of projectors. With ScreenPlay's award-winning image quality, you may believe you are buying a system worth tens of thousands. The ScreenPlay 4805 projector will open your eyes to image definition and clarity far superior to other home entertainment alternatives — and nothing produces a thinner image than projection.

Any room, any style.

Select the home entertainment setup that fits your style. With a projector your wall and room are yours again when the show is over — no big black box ruining the design of your home. Project from a tabletop or mount the ScreenPlay 4805 on your ceiling — the choice is yours. Turn it on and watch your living room turn into a cinema.

See what you've been missing.

Every aspect of the ScreenPlay 4805 is optimised for video, giving you stunning images that are true to the source, with contrast, colours, and brightness calibrated to recreate exactly what the movie director intended. First, there's native 16:9 DarkChip2™ DLP™ technology from Texas Instruments®, the only display solution that creates an entirely digital connection between a source and the screen in front of you, for a true reproduction of video. You get maximum accuracy of picture clarity, brilliance and colour that you have to see to believe. With the reflective technology, DLP has an exceptionally long life, and its colours will not fade with time. Then, with Academy® award winning enhanced Faroudja DCDi™+, InFocus has perfected the optimal deinterlacing process for perfect output and smooth images, regardless of the source. Feel as though you were sitting at the first row at a concert of your favourite band playing life-size in front of you.

Digital connections mean better pictures.

Plug in any type of games box to project games so big you'll be tempted to jump into the screen. Or show off your holiday photos from your digital camera or your home movies from your camcorder. Virtually any digital source is fully compatible with the digital display technology of the ScreenPlay 4805. It connects easily with your VCR, DVD player or satellite receiver.

Heavyweight features, lightweight package.

If you ever want to take your ScreenPlay 4805 to a friend's house or on a trip, it's easy. The ScreenPlay 4805 projector is small and weighs only 3.5kg. In fact, it's small enough to carry under your arm.
