

Cinehome

The Cinehome projection screen is a high-end, elegant framed screen with a black aluminum frame. The black colour absorbs light and avoids disturbing reflections. Another detail of the Cinehome framed screen is the high-quality projection fabric which was designed especially for beamer projections. On the rear, the screen has lugs to attach to the aluminum frame. The frame is assembled quickly and is particularly suited to be mounted permanently to a wall.

Product details:

- Black velvet frame.
- Either with front or rear projection material.
- Screen is optimised for beamers.

Cinehome - Technical data (all dimensions in cm)
