

Projection screen in landscape format

A high-quality fabric with a wide viewing angle is used for this handy projection screen simply hung to a hook. When rolled up, the landscape projection screen can be stored at a small space. When rolled out, it can be hung everywhere. These are the advantages which will be decisive wherever cost-effective and flexible projections are required. With a total width of four metres, the projection surface of the screen is 12 m².

Product details:

- Projection screen in UltraLux, matte white, 1.2 gain.
- Easy-to-care screen for everyday use for fast and mobile applications.
