

**PROJECTA****NEW!**

MovieBoard

Unique "ready to use" projection screen with super image

Use the MovieBoard to create your own Home Cinema, gaming room or football stadium and enjoy fantastic, large format image quality.

More and more people are discovering how much more pleasant it is to watch a large screen in the comfort of one's own home, alone or with others. To do this, a top quality projection screen is a must. Why should you spend the time compiling a fantastic film collection and buy an expensive projector and DVD player only to be disappointed by the end result? Projecta has developed a unique board screen for Home Cinema applications.

The MovieBoard is a lightweight projection screen that is ready to use straight away. There is nothing more to assemble after purchase, and the MovieBoard is easily mounted to the wall using two screws. Ease-of-use for every consumer. You will be able to enjoy your MovieBoard in your own home in no time. And most importantly: it will display your film collection beautifully.

Screens
for professionals

Your football stadium

The gaming room

Your Home Cinema

MovieBoard, a special Home Cinema projection screen

This is why Projecta has developed a unique board screen for Home Cinema applications. It has a modern and sleek design. It is easy to integrate in any interior. It is ready to use immediately. After purchasing the pre-assembled MovieBoard, all you have to do is mount it to the wall. Mounting the MovieBoard is extremely easy thanks to the mounting materials supplied with the screen.

The projection screen fabric is applied to a special board. This ensures that the projection screen fabric is always 100% taut, in every possible situation. The matte white projection screen fabric produces a natural colour display. This fabric also ensures a large viewing angle with good image quality from every position. The black aluminium frame frames your image and increases the perceived clarity of the image. The MovieBoard is available in the widths 120 and 160 cm and in the image formats 4:3 video and 16:9 HDTV.

Aspect ratio	Screen size HxW in cm	Viewing size HxW in cm	Nominal Diagonal Inches / cm	Product code
Video 4:3	99X129	90X120	59" / 150 cm	10600025
	129X169	120X160	79" / 200 cm	10600026
HDTV 16:9	77X129	68X120	54" / 138 cm	10600027
	99X169	90X160	72" / 184 cm	10600028

Projecta Clear and sharp - always in the picture

For more than 50 years, Projecta has been in business as an internationally trendsetting manufacturer and supplier of high-quality projection screens and presentation furniture. Projecta operates on a global scale and has been the market leader for years. The company understands like no other the quality standards demanded by the professional user or proud owner of a Home Cinema system.

In our view, the screen is the essential component in every professional or Home Cinema system. However well prepared the presentation may be, or how intriguing the film, without high-quality equipment, the image will never be as sharp or clear as it should be. Although this applies to an LCD/DLP projector, it definitely also applies to the projection screen.

We remain in constant contact with our partners and end users. New technologies are closely monitored and followed. In this way, we are able to continuously expand and improve the range of projection screens and screen fabrics. We can offer the perfect solution for each projection application. Whatever your specific wishes may be...
