# Such a pity that our fantastic screens are so beautifully concealed...

Projecta offers a full range of built-in projection solutions

Appearances count! That is precisely why Projecta's projection screens are so well concealed. After all, top-quality presentation equipment deserves a room in which it is shown to its best advantage!
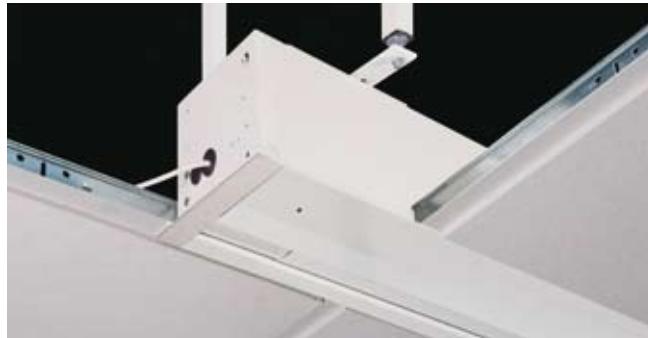

Europe's nr.1
in projection screens

**IIPROJECTAII**
Screens for Professionals

Advantage Deluxe Electrol

The very best in electrical projection screens
with a motorized closure panel. As the projection
screen is fully flush with the ceiling, it is completely
invisible when not in use.

Special features
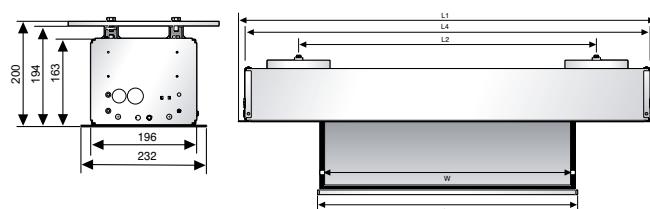

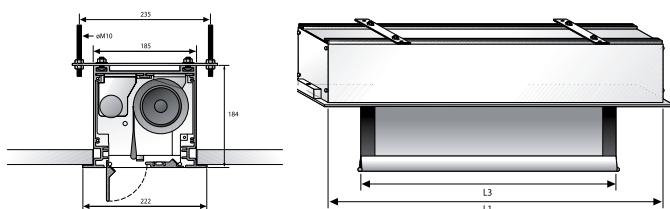

- Design aluminium case with motorized closure panel for
  stylish ceiling integration
- Easy to install: case is installed first, followed by the metal
  roller and screen fabric, reducing the risk of the fabric being
  damaged
- Patented 'in-the-roller' motor mounting system for quiet
  operation
- Motor and screen fabric remain accessible after installation
- Operation of the projection screen can be integrated into
 AV room controls

New! Integrator Electrol

Versatile and comprehensive options for
AV system integration. Low-noise, high-speed motor.
Equipped with a unique electrical mechanism which
allows the closure panel to fold upwards into the
ceiling. Ready to use surprisingly quickly.

Special features

- Unique closure panel mechanism for perfect ceiling integration
- Visible components available in any colour
- Equipped as standard with a module featuring potential-free
  contacts for smooth integration into AV room controls
- Can be extended to include RS232 serial control and IP control
- Easy installation with optional wall and ceiling brackets;
  prewired for electrical installation
- Easy service system: motor and screen fabric remain accessible
  after installation. Closure panel and case remain connected to
  each other
- The Integrator Electrol can also be custom-made to order.
  A selection of various high-quality screen fabrics is available
  for custom-made systems, including the unique Matte White M.
  The structure of this particular projection screen fabric ensures
  that it can only be rolled up in one direction, guaranteeing that
  the surface is very flat when hanging.
- Supplied as standard with infrared (IR) remote control
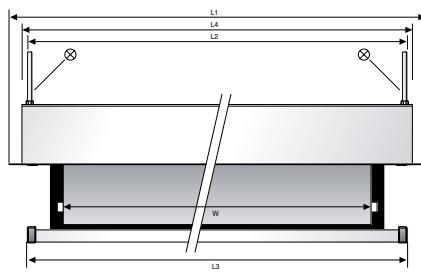

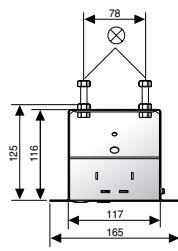

New! Descender (RF) Electrol

Robust steel casing, economical and attractive built-in solution. Building in a budget-friendly projection screen was never so easy.

Special features

- Durable casing, attractive closure with the screen's slatbar for inconspicuous ceiling mounting
- Visible components available in any colour, allowing for integration into any interior
- Easy installation with optional wall and ceiling brackets, prewired for electrical installation
- Easy service system: motor and screen fabric remain accessible after installation, closure panel and casing remain connected
- Also available with RF control
- The Descender Electrol can also be custom-made to order. A selection of various high-quality screen fabrics is available for custom-made systems, including the unique Matte White M. The structure of this particular projection screen fabric ensures that it can only be rolled up in one direction, guaranteeing that the surface is very flat when hanging.

Mounting kit for ceilings
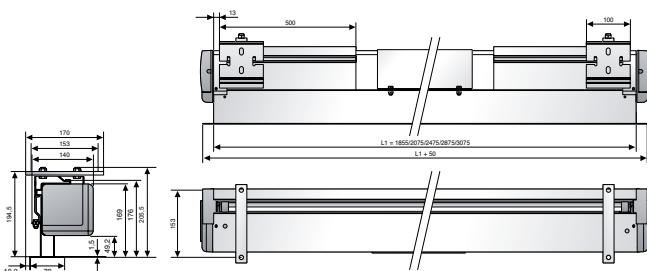

The system for achieving a completely inconspicuous finish in modular ceilings!

With this mounting kit, your Cinelpro Electrol or Elpro Electrol (1:1) projection screen can be attractively concealed but always ready for use.

Special features

- Easy installation with supplied brackets
- The mounting kit integrates closely with the ceiling tiles
- The feed-through aperture is hermetically sealed by the screen's slatbar
